

The Engagement Model

- Project Based
 - Software testing for a '**specific project**' with a defined scope and timeline for functional testing, load testing, test automation or test execution.
 - Hourly charge for specific work project
- Long Term Relationship
 - Software testing work on a '**Long-term Contract**' basis to a 'Dedicated Test Center' setup in India that will act as an extension of the customer's QA / Testing team.
 - 1 fully dedicated Project Manager (India or Canada based - single point of contact)
 - 2 fully dedicated Quality Testers
 - Additional resources as required
 - Regular report-outs, results summary, recommendations
